

Auxiliary Dome Camera

The auxiliary dome camera is perfectly suited for professional and fully integrated installations in the rearview mirrors of a vehicle, or directly on the sides or back of the vehicle.

FEATURES

VIDEO RECORDING AND AUTOMATIC UPLOADS

- When connected to the CAM Pro the vehicle will be covered in almost a 360° view, providing the full context when an incident or risk takes place.

EASY INSTALLATION

- The dome camera can be installed with the clamp mount or without it, mounted directly on the vehicle side rear mirrors or any other exterior location.

COMPATIBILITY

- CAM Pro
- PRO X multicradle
