

Auxiliary Rear Camera

The auxiliary rear camera is designed for light to medium vehicles. It is intended to be installed on the interior and mounted on the rear windshield, providing an easy installation for basic rear-view applications.

FEATURES

VIDEO RECORDING AND AUTOMATIC UPLOADS

- When connected to the CAM Lite or the CAM Pro the vehicle will be covered in almost a 360° view, providing the full context when an incident or risk takes place.

EASY INSTALLATION

- The rear camera is easily installed in the interior of the vehicle, mounted directly on the rear windshield.

COMPATIBILITY

- CAM Pro: AUX.REAR Pro 9KVP. 001.21.1
- CAM Lite: AUX.REAR Lite 9KVL.001.03.1
- PRO X multicradle
