Webfleet eLogs

Go beyond ELD compliance

WEBFLEET eLogs is the complete solution to comply with FMCSA ELD and NOM-087 rulesets for Hours of Service (HOS) and DVIR (Driver Vehicle Inspection Reports). Helping you comply with regulations, reduce costs, boost productivity and take driver safety to the next level.

BENEFITS

SIMPLIFY COMPLIANCE
• Prove HOS compliance with accurate RODS (Records of Duty Status) logs
• Easily comply with cross-border HOS requirements for NOM-087 and ELD mandates
• Stress-free DOT (Department of Transport) roadside inspections with instant transfer of HOS log records
• Complete visibility of drivers' compliance status and vehicles' conditions
• Streamline vehicle inspection checks in line with DVIR regulations
• Protect your CSA score (Compliance Safety and Accountability)
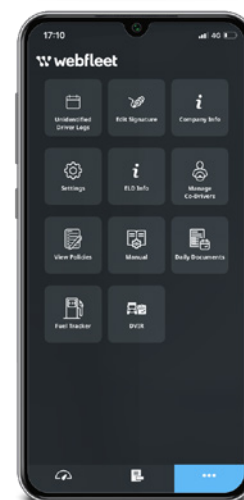

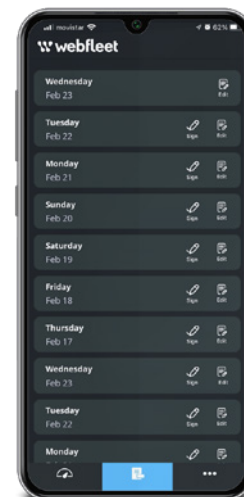

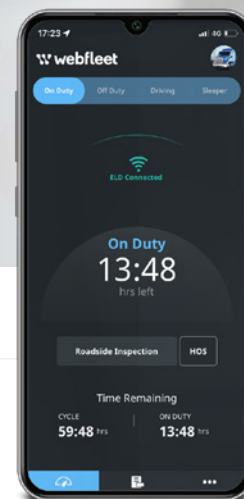

SAVE COSTS, BOOST PRODUCTIVITY
• Gain complete visibility of compliance status of drivers and vehicles available for duty
• Reduce fines and penalties with violation alerts and accurate log audits
• Reduce back-office tasks with simple digital log management
• Improve fleet performance and driver collaboration with better communication and reporting
• Reduce maintenance costs and minimize downtime with digital vehicle check

DRIVER SAFETY AND EMPOWERMENT
• Intuitive app to help drivers comply with ELD and NOM-087 mandates
• Always know how many driving hours and duty time hours are remaining in current day and weekly cycle
• Visual notifications alerting drivers when approaching legal limits
• Reduce time spent filing in Records of Duty Status
• Improved driver safety—clarity of remaining driver hours for Manager, Dispatcher and Driver
• Simple to follow checklist for DVIR inspections

FEATURES

FOR THE FLEET MANAGER/DISPATCHER

DRIVER STATUS AND VIOLATION WARNINGS
- Dashboard view with real-time status of drivers' hours—drive time, on duty time and duty cycle remaining
- Pop-up notifications give real-time warnings of a potential HoS violation
- Event alerts tell you what's happening on the road, such as driver stopped for inspection, or driver involved in an accident
- View all drivers who have access to the app and status of ELD connection, as well as see fleet managers who have access to the module

EFFORTLESS LOG MANAGEMENT AND DOT AUDITING
- Preview and manually edit logs for sign-off by drivers before online submission to DOT
- Assign default HOS rule sets for cross-border trips between US and Mexico
- One click DOT audit submission of log data directly to FMCSA (Federal Motor Carrier Safety Administration)

REPORTING AND FUEL TRANSACTIONS
- Range of duty status reports can be downloaded or sent to an email address (duty status, violation report, driving event report, HOS violation details)
- Access fuel transactions report displaying latest fueling location, refill history, receipts, prior to IFTA tax claims

STREAMLINE VEHICLE INSPECTIONS
- View submitted checklists, reports, and be notified of unroadworthy vehicles for DVIR compliance via WEBFLEET Vehicle Check[1]

FOR THE DRIVER

RECORDS OF DUTY AND HOS STATUS
- Easily set and view Driver's Records of Duty Status (RODS) and see countdown clock of remaining cycle time
- View daily and weekly remaining Hours of Service (HOS) time
- Violation alerts warn of approaching duty status legal limits

LOG MANAGEMENT, DOT INSPECTIONS AND WALK-AROUND VEHICLE CHECKS
- Drivers can easily edit, sign and submit logs via the app
- Stress-free log submission at roadside DOT inspections
- Toggle to WEBFLEET Vehicle Check app to perform a DVIR vehicle walkaround inspection and submit paperless checklists

DRIVER REPORTS AND FUEL TRACKING
- Submit daily documentation for review; delivery receipts, dispatch records and other documents
- Enter fuel transactions, location of where the refill took place and upload receipts
