

# PRO M with Laser Scanner

**An ultra-fast professional scanner solution: Ultra-fast, effortless and comfortable**

Elevate your fleet's capabilities with the PRO M combined with a laser scanner. Simplify your workflow with professional scanning on the go, using the PRO buttons for instant scanning and seamless switching between Work App and the TomTom GO Fleet app. Eliminate driver stress with a smartphone-designed interface that's easy to use in vans and small cars

## BENEFITS

### EFFORTLESS SCANNING EXPERIENCE

- The advanced scan engine and strategically positioned aimer work together to alleviate physical strain, empowering users to effortlessly point and shoot using the ergonomic PRO button for efficient barcode scanning.
- The palm-balanced device, featuring a natural thumb placement, the lightweight device prioritises user comfort during scanning, minimises fatigue and promotes a more comfortable user experience.
- Effortlessly transition between handheld and pistol grip modes for adaptable use in different scenarios.
- Provide up to 60% less postural demand than consumer device-camera system and up to 50% less muscle work with the lowest physical demand.\*

### GREATER WORKFLOW EFFICIENCY

- Achieve significant time savings by increasing daily barcode scans, with more than 20 minutes saved per 100 scans.
- Enhance your team's efficiency: 80% of users prefer devices with built-in scan engines, resulting in 40% faster picking times, leading to increased operational speed and efficiency.\*

### SWIFT AND RELIABLE TARGET ACQUISITION

- The integrated scanner quickly pinpoints barcodes outside the direct view, ensuring faster target acquisition without constant screen checks.

## FEATURES

### PRO BUTTON FUNCTIONALITY

The dedicated PRO buttons, conveniently located on the side of the phone, allow quick switching between Work App and TomTom GO Fleet with the left button, and barcode scanning with the right button.

### INDUSTRY-LEADING ZEBRA® SCAN ENGINE

A highly ruggedised housing makes it ideal for use under harsh conditions. The device operates reliably in extreme temperatures with a long battery life and a design that makes it comfortable to hold in one hand.

### ALL-IN-ONE DEVICE

The high-performance laser scanner, combined with the versatility of a cutting-edge mobile phone, offers a seamless workflow experience to maximise efficiency.

## SPECIFICATIONS

Scan engine: Zebra®

LEDs: Aiming: 610nm, Illumination: 660nm (hyper red)

Classification: Exempt Risk Group LED (IEC/EN 62471)

Field of view: Horizontal: 42°, Vertical: 28°

Tolerance: Skew/Pitch: ±60°, Roll: 360°

Distance range: Up to 60 cm/24"

1D symbologies: UPC, EAN, Code128, Code39, Code93, Code11, Interleaved 2 of 5, Discrete 2 of 5, Codabar, MSI, RSS

2D symbologies: PDF417, MicroPDF417, Composite, RSS, TLC-39, Datamatrix, QR code, Micro QR code, Aztec, MaxiCode; Postal Codes

Scan modes: Scan into text field, Copy to clipboard, continuous scanning and more
