

Webfleet Working Time

Report working time easily and accurately for payroll and invoicing efficiency

Webfleet Working Time gives fleet managers, HR teams and dispatchers full, real-time visibility over driver activity. Drivers can log working time via Work App any time, any place. Combining tachograph and non-tachograph data in one clear view, Webfleet Working Time displays not only driving, working and break/rest time but details outside-the-vehicle activities such as loading, fueling or cleaning. Accurate data can be exported via report or API.

BENEFITS

FOR FLEET MANAGERS AND HR TEAMS

- Improve accuracy and reduce admin time for payroll reconciliation
- Invoice customers accurately for drivers' working hours per activity performed
- Gain visibility into time spent per activity and reorder schedules to prioritise higher value tasks

FOR DISPATCHERS

- Refine planning, knowing how time is typically split across activities
- Gain greater visibility and control over the activities performed when a tachograph is set on 'Other work'
- Track time wasted on non-valuable tasks live, e.g. waiting at a customer site

FOR DRIVERS

- Track your working hours across multiple activities to comply with local regulations
- Easily log working time from anywhere with Work App
- Ensure correct payment according to the hourly rates defined for different activities

FEATURES

VIEW TACHOGRAPH AND NON-TACHOGRAPH RECORDINGS SIDE BY SIDE

All a driver's hours information is displayed on the Working Time tab so fleet managers can get a complete picture of driver days. To review the specifics, managers can filter details by data source: Tachograph, PRO driver terminals or Work App. All records can be exported in report format or shared via API integration through Webfleet.connect.

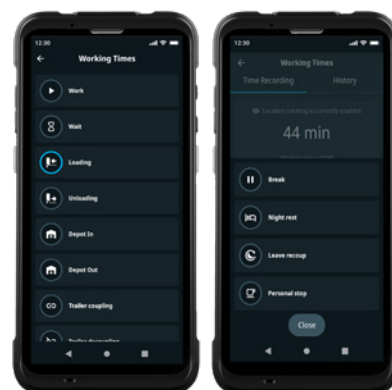

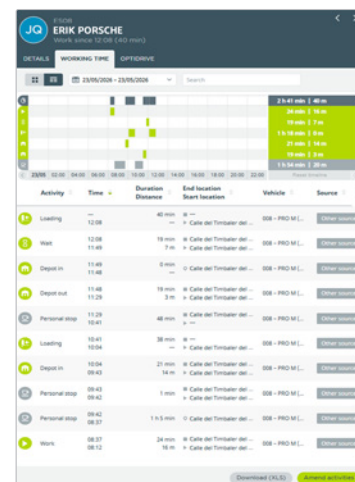

TRACK 20+ ACTIVITIES CARRIED OUT DURING WORKING TIME

Gain visibility into the type of activity — such as loading, unloading, waiting and night rest — and time spent doing the activity during a driver's day. Get insights into each task's time to prioritise more effectively. Ensure customers are invoiced accurately for all work done.

LOG WORKING TIME FROM ANYWHERE

Drivers can log working and break times from anywhere with Work App. Its easy-to-use interface makes for minimum admin hassle, mental effort and disruptions. Whether connected to a vehicle or outside the cabin, drivers can report all their activities with a few taps of their fingers.

WHAT YOU NEED

**ECO, BIZ,
APP-BIZ-1 or
LIVE tariff**

**Tachograph, PRO i,
PRO M, PRO X
or Work App¹**

**Contact support to pilot
detailed tracking for 20+
activities in Work App**

¹ Detailed working time activities is only available in Work App, PRO M or PRO X.
